ANNUAL REPORT

ON

INDENTURED INDIAN IMMIGRANTS

IN

THE COLONY OF GRENADA

FOR

1882.

GRENADA.

CHARLES WELLS & SON, GOVERNMENT PRINTERS.

22

SECRETARIAT
LIBRARY

IMMIGRATION OFFICE,
Grenada, 17th February 1883.

SIR,

I have the honour to transmit herewith the Annual Immigration Returns for the Year 1882.

2. The most notable features in these Returns are the small mortality and the large birth-rate. No stronger proof of the adaptability of East Indians for emigration to Grenada could be advanced than the results shown by the statistics which I now have the honour to submit:

	MORTALITY.	BIRTH-RATE.
1882	1 24 per cent.	6 81 per cent.
1881	1 68 „	3·57 „

3. The natural increase of the "*Hermione*" Immigrants is larger than could have been expected, bearing in mind the fact that of the adults introduced in this ship the proportion of the sexes was about two women to every five men. For the four years and nine months to the 31st December the net increase on the number allotted has been 13½ per cent.—a rate of increase which, if not checked by return to India, migration to other Colonies or other causes would double the number of the East Indians who arrived in this vessel in less than 35 years; but there is every reason to believe, from the fact that there is a manifest tendency towards the equalisation of the sexes by the larger number of female births, that in a few years the increase would be greater than it is at present.

4. There has been a decrease in the total number of cases treated in the hospitals, but the loathsome disease "Yaws" has shown no diminution. It is, however, confidently expected that the increase of accommodation at the Yaws Hospital, which has lately been made, will have a most beneficial effect, as Yaws cases can now be removed from the estates as soon as the disease developes itself and before the contagion spreads to other immigrants, whereas previously, in many cases, it had been found impossible to do so on account of the crowded state of the institution. The average daily number of patients treated in the hospitals for the year has been as follows:

Colony Hospital. Yaws Ward	8·85	
Children accompanying their parents	2 27	
		10 62
Other Wards		80
St. Andrew's District Hospital		2 72
St. Patrick's do. do		2·53
St. John's do. do.		·55
TOTAL		17·22

5. The St. John's Hospital has been opened during the year, and the St. Andrew's and St. Patrick's Hospitals have received native as well as immigrant patients for treatment. The above statistics, however, only relate to immigrant patients.

6. There has also been a considerable decrease in the number of complaints against indentured immigrants, but it is satisfactory to observe that there have been fewer cases which have not been pressed to an issue. There has only been one case of a very aggravated crime, amongst the indentured immigrants, viz., that of perjury, and only three cases of conviction under the criminal law during the year. This, I think, warrants my saying that the immigrants have behaved in a very peaceable and orderly manner and have contributed very little to the criminal statistics of the island.

7. There was one charge against an employer for neglect to supply diet to an indentured immigrant which had been ordered by the Medical Officer. In the exercise of my duty as Protector of Immigrants I brought this case for trial before the Police Magistrate of the Eastern District, who imposed a fine of three pounds, and six shillings costs This fine will, doubtless, be the means of ensuring in future greater care of his immigrants in this respect by the employer in question.

8. I regret to report that a murder was committed during the year by a time-expired immigrant who came to Grenada in the "*Accrington*" twenty years ago. The murderer was executed.

9. A very satisfactory report has been received from India showing

that the return immigrants who sailed in the "*Syria*" arrived in Calcutta without any deaths having occurred during the voyage.

10. No immigrants have arrived in Grenada during the year under review, and no intelligence has yet been received as to the shipment of those indented for in 1880, the order for which was repeated in 1882. It is much to be regretted that such delays should occur in the supplying of immigrants for this colony as agriculture is retarded and the best interests of the island suffer in consequence.

11. The Wages Returns shew an increase of average wages paid to all classes of the indentured immigrants as compared with 1881, but there has been a decrease in the number of days work performed.

12. I am glad to be able to report that the Secretary of State for the Colonies has sanctioned the substantial amendment of the Immigration Ordinance of 1879 with the view of facilitating the working of the immigration system of this colony, and there appears every reason for anticipating that when these amendments are effected it will be possible to prevent much waste of time, thereby benefiting alike the employer and immigrant.

13. The medical attendance on the immigrants has been regular, and leaves nothing to be desired as all their medical wants have been promptly and effectually attended to. To this fact must doubtless be attributed the very small death-rate which I have already had the honour to comment on. A further effort has been made to improve the sanitary arrangements on estates by prohibiting the keeping of pigs in the vicinity of the dwellings, a course which had become necessary from the great increase in the number of this class of small stock kept by the immigrants on account of the large profit made on them

14 I am glad to report that the signs of prosperity amongst the indentured immigrants are becoming more and more marked. It is now no unusual occurrence for them to keep horses for riding purposes which they depasture on the estates free of charge, in addition to cattle and small stock. The gardens are in some cases also extensive and valuable. For instance. one man of Plaisance Estate whose garden was maliciously destroyed by one of his countrymen had the garden valued and it was appraised at twenty-five pounds. Another man at Beausejour Estate planted canes on the metayer system which made eleven barrels of sugar, five and a half of which remained as his proportion.

15. I have great pleasure in reporting that the number of immigrant depositors in the Government Savings Bank is increasing, and it is certain that this useful institution will in a short time be greatly utilised by the coolies.

16. It may not be out of place to call attention here to the large proportion of the East Indian population in this colony who have embraced christianity. The following extract from the Census Report compiled by Mr. D. G. Garraway will show the numbers on the 1st May 1881 when the Census was taken :

"It is worthy of especial notice that no less than 657 or 41.79 per cent. "of the coolies now in the colony have abandoned their own faith and "adopted christianity. They appear as follows :

"Anglicans,	534 or	81.28 per cent.
"Roman Catholics,	121 or	18.42 ,,
"Wesleyans	2 or	30 ,,

The number of Mahommedans and Hindus returned was 919. Over two-fifths of the East Indian population, therefore, were Christians, and I understand that they contribute a fair share to the revenues of the disestablished Anglican Church. It is quite a usual sight in the Parish of St. Andrew's to see East Indians riding to church in expensive European costume.

17. The subject of the education of East Indian children has been under the consideration of the Government, and a special scheme has been drawn up and submitted to the Secretary of State for the Colonies. The present schools of the colony are of course open to East Indians, but they do not appear to have made use of them.

18. I have much pleasure in calling attention to the very satisfactory condition of the Immigration Fund. At the end of 1882 there was a balance of over £7,000, partly invested in Exchequer Bills and partly in the hands of the Government, besides £1,920 lent to the Water Fund. Against this must be placed the balance of the Immigration Loan, viz., £6,000 repayable in annual Instalments of £1,000 with interest at the rate of five per cent. per annum.

19. With regard to the time-expired Immigrants several instances have come under my notice during the year of the possession of considerable property. One man recently died who had attained to the position as manager of a small sugar estate, leaving personal effects which were sworn under £200, and five acres of land bequeathed to his wife.

20. Passports have been granted to 14 time-expired immigrants during the year, all of whom informed me that they intended to go to Trinidad. Considering that Trinidad is within a few hours sail, and that there is a very large East Indian population resident there, it is only to be wondered at that a much larger number do not go there annually. This circumstance may be regarded as evidence of prosperity here.

21. Reviewing the statistics for the year I am of opinion that very favourable results have on the whole, been obtained, and that defects are only observable in details which it is possible to remedy by legislation. The relations of the immigrants and their employers are very good and afford me no cause for anxiety, and the immigrants are prosperous to a degree impossible in their native country, and have a much better chance of prolonged existence than their countrymen possess in India.

I have the honour to be,
Sir,
Your most obedient servant,
PHILIP C. CORK,
Protector of Immigrants.

His Honour
R. T. GOLDSWORTHY, C.M.G.,
Administrator.
